For several years I have been designing and developing websites and interactive applications. I have a range of technical skills, including Semantic XHTML, CSS, JavaScript, XML and ActionScript 1 and 3. I regularly develop interactive activities and applications using Adobe Flash and more recently using Adobe Flex. I am interested in developing these skills further with a focus on Rich Internet Application development and application development for the Adobe AIR platform. I am also very interested in working on projects aimed at the mobile market. I have experience in performing usability evaluations by means of user testing, heuristic evaluation and using information architecture techniques such as card sorts. I keep up to date with industry trends by attending relevant conferences, subscribing to industry journals and blogs, as well as regularly visiting and posting on technical and creative forums.

In my spare time I enjoy going to the gym, swimming, power kiting, socialising and working on personal projects that allow me to develop my technical skills further.

Regards

Barry Gee

## Relevant Work History

### Shared Web Manager – Durham County Council (April 07 – To Date)

My role involves developing e-learning materials and games for the modern and foreign languages section of the Durham Learning Gateway, Supporting the advisory teaching team in the delivery of training courses, and the production of in-house graphics and web design assets.

### Freelance Designer / Developer (September 02 – To Date)

I have worked on a range of commercial projects in the areas of print graphics, website design & development, 3D animation, usability evaluation, and consultancy work.

### Designer – MAAD Ltd (June 2005 - September 05)

This was a ten week summer work placement that gave me the opportunity to work on a range of print and interactive design projects for clients such as Pantene, L'Oreal and a number of small local companies.
